

Bank Kitchen Recipe: Strawberry Jello Cake

Servings: 15-20 people

Submitted by Brandy

Ingredients: one (1) 18.25-ounce box of Duncan Hines® white cake mix; one (1) 0.3-ounce box of strawberry JELL-O® gelatin dessert; and one (1) 8-ounce container of Cool Whip®.

Pre-heat oven to 350 degrees Fahrenheit.

Prepare and bake the cake mix per the directions on the box. Then, while the cake is baking, prepare the gelatin dessert per the directions on the box.

Allow both the cake and gelatin to cool.

Next, poke holes in the cake using a fork and then pour the liquid gelatin over it's top.

Finally, spread the Cool Whip® over the cake; chill, and serve. Enjoy!

Note: for added flavor, garnish the cake with fresh fruit or substitute the strawberry gelatin with a flavor of your choice.
